HYDRAULIC NOTCHING MACHINE MODEL: QF28Y- 4 x 200 (FIXED ANGLES)

TECHNICAL PARAMETER:

HYDRAULIC NOTCHING MACHINE (FIXED ANGLES)	
Model No.	: QF28Y 4 x 200
Brand Name	: "PROTECH"
Min. Notching Thickness	: 0.5mm – MS/0.5mm- SS
Max. Thickness	: 4mm – MS / 2 mm –SS.
Dimension	: 1050 x 950x 1150 mm

Weight	: 400 Kg.
Brand New	: China

MACHINE DESCRIPTION:

Hydraulic Notching Machine also can be called Corner Notching Machine or Angle Notching. The Angle Cutting of Fixed Type is 90°. It is suitable for using in various corners notching application.

MACHINE FEATURES:

- Strip cutting device with scale fast adjustment for Max. strip size 200 x 200 mm
- 2 selflocking stops with moveable and exchangeable stop bar 350mm in length.
- 1 set upper and 1 set bottom of blades for stainless steel, reverse type.
- Triplex scale on the working table for fast adjustment of the stops.
- Fixed blades clearance for any thickness and material.
- Moveable and set up switch.
- Single and set up stroke.
- Adjustable stroke.
- 2 Sheets holders
