

PIPE NOTCHING MACHINE Model: TT 90

MACHINE DESCRIPTION:

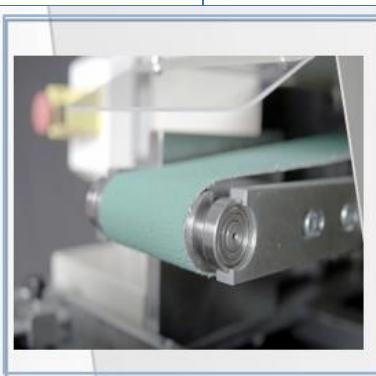

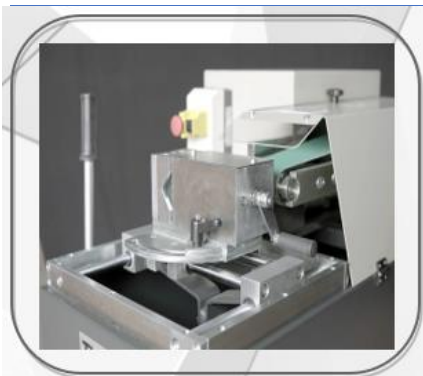

Pipe Notching machine is manually operated with the blade **notching** up to **90° notch** to one section of the **tube**. The Pipe notching machines also called "abrasive notcher" or "tube notcher" is machines that work by abrasive belts. Pipe notching machines are designed to prepare tube corner joints for welding process.

Standard Accessories

- Ability to open suitable dovetails according to the diameter of the pipe and pro le with the help of processing drum
- Ability to tighten and loosen the parts quickly as a result of moving clamp
- Ability of clamp to move right and left sideways
- With movable clamp, notching up to 50° degrees angle
- Adjustable speed with inverter
- Notching operation up to 3" pipe
- **Ø19, Ø21, Ø25, Ø32, Ø38, Ø42, Ø48, Ø52, Ø60, Ø76 rolls standard for TT90**

TECHNICAL PARAMETERS:
PIPE NOTCHING MACHINE

Model	: T90
Brand Name	: "TUBEND"
Clamp Capacity (mm)	: Φ 16- Φ 90 mm
Notching Capacity (mm)	: Φ 16- Φ 90 mm
Belt Size	: 100 x 1250 mm
Motor Power	: 2.2 kw
Mandrel Diameters (Φ)	: Φ19, 21, 25, 32, 38, 42, 48, 52, 60, 76
Voltage	: 380V / 3Phase / 50Hz
Dimension (L x W x H)	: 1200 x 600 x 1150 mm
Weight	: 180 kg.
Brand New	: Turkey
