

VERTICAL DRILLING MACHINE Z5050A

MACHINE DESCRIPTION:

The machine tool is used as drilling, counter boring, reaming, tapping and spot facing with advantages of large drilling capacity and wide scope of processing parts, therefore this machine is not only used on product workshops but also for repairing workshops. Table support can go up and down and can also be rotated $\pm 180^\circ$ around the column. The table can be rotated $\pm 180^\circ$ in the table support and can also be rotated $\pm 45^\circ$ horizontally with support base. So, the operation of this machine tool is portable, flexible and reliable.

TECHNICAL PARAMETERS:
VERTICAL DRILLING MACHINE

Model No	Z5050A
Brand Name	"PROTECH"
Drilling capacity(mm)	: 50
Tapping capacity	: M30
Spindle tapper	: MT5
Distance column -Spindle	: 440
Distance Spindle -base(mm)	: 1180
Column diameter(mm)	: 180
Worktable(mm)	: 580x580
Base(mm)	: 800x525
Spindle speed(1/min)	: 52-1400(12 Steps)
Spindle travel(mm)	: 200
Main motor power	: 3 KW
Dimensions(mm) (L x W x H)	: 1120x680x2545
Machine Weight (Net/Gross) (kg)	: 630Kg
Brand New	: Made in China

FEATURES:

- Spindle electromagnetism clutch transmission feed
- Motorized adjustable workbench
- Rotatable and tiltable worktable
- Auto tapping function
- Coolant system
- Spindle protection with microswitch
- Embedded halogen work light
